

The HTPC-2008V has a integrated two-lines LCD display, which can be configured individually to show miscellaneous information like system info, email inbox, news, weather info etc.

Front connectors, like USB, Microphone, Headphone and eSATA as well as a ten button control panel for media function complete this case to a real Multimedia Station for living rooms. The Spoilt for choice between HD-Audio and AC97 makes it much more perfect for your entertainment. The space up to eight hard disks is unique in this market. Altogether a must have for people with technical and creative feeling.
